EXPERIENCE

FRONTEND DEVELOPER

HexaHealth, Gurgaon, Haryana

Feb, 2021 - Present

- Migrated .NET website to NextJS with improved UI & SEO.
- Implemented techniques like image compression, code minification, server components and lazy loading to achieve a Google PageSpeed Insights score of **90+** for marketing pages resulted in a remarkable **30% reduction** in advertising expenditure.
- Conducted code reviews to ensure code quality, adherence to coding standards, and best practices.
- Collaborated with UX/UI designers to implement modern and intuitive user interfaces for web applications.
- Collaborated with backend developers to implement seamless integration between front-end and server-side logic and display dynamic data on web pages.
- Ensured cross-browser compatibility and responsiveness, resulting in a seamless user experience.
- Implemented event tracking through GTM to capture user interactions such as clicks, form submissions, providing valuable data for UX improvements and marketing insights.
- Developed and maintained custom GTM triggers and variables to capture user behavior events, enabling precise and targeted DOM manipulations in alignment with business objectives.

PROJECTS

Movie Website Live Demo | GitHub

- **Responsive Design:** Implemented a responsive and visually appealing user interface using **NextJS & Tailwind CSS** ensuring a seamless experience across devices.
- **Frontend Development:** Utilized NextJS to create dynamic and interactive components, enabling users to browse through a vast collection of movies and TV shows effortlessly.
- **Data Integration:** Integrated with a third-party API to fetch real-time data about movies, TV shows, and celebrities. .
