Lokesh Choudhary | Frontend Engineer

Gurgaon | 9172659994 | lokesh.cdewanand@gmail.com | Portfolio | LinkedIn | GitHub

SKILLS & TECH STACK

- Frontend Technologies: **React, Next.js**, **Redux**, Bootstrap v5, Chakra UI, **Tailwind CSS**
- Backend Technologies: **Node.js**, **Express**, **MongoDB**, SQL
- Languages: **JavaScript (ES6+)**, **TypeScript**, HTML5, CSS3
- Tools & DevOps: Webpack, npm, **GitHub, Vercel, Google Tag Manager (GTM)**

PROFESSIONAL EXPERIENCE

HexaHealth, Gurgaon - Frontend Engineer | **Jan 2023 - Present**

- Migrated legacy platform from **.NET/jQuery** to a modern **React + Next.js** stack, implementing **SSR** and **SSG** to reduce average **page load times by 30%** and boost user engagement metrics.
- Built mobile-first, responsive UIs using Bootstrap v5, achieving **98% user satisfaction** across devices and ensuring full **cross-browser compatibility**.
- Optimized **Core Web Vitals** (FCP, LCP, CLS, TBT) from 55 to 90+ in Next.js, using **lazy loading, server components, code-splitting, and Redis caching**, leading to **30% lower bounce rates** and **30% marketing cost reduction**.
- Integrated **Razorpay** to enable secure, real-time payment flows, increasing premium service transactions by 20%.
- Collaborated with design and PM teams to revamp user journeys (e.g., appointment booking, BMI tools), resulting in a **15% boost in conversion rates** and increased revenue.
- Implemented on-page SEO strategies (meta tags, structured data, keywords), scaling from **5K to 25K daily** and reaching **3M+ quarterly users**.
- Integrated dynamic components with REST APIs for real-time rendering, reducing data fetch delays by 20% through optimized API handling and error fallback strategies.
- Developed an automated EHR coupon delivery system, increasing distribution speed and efficiency by 30% through Node.js-driven workflows.
- Led code reviews to enforce best practices (DRY, modular design), **cutting code redundancy by 15%** and accelerating sprint velocity by 10%.
- Configured event tracking with **Google Tag Manager**, enabling data-driven UX enhancements that raised **lead conversion by 14%.**

PROJECTS

StreamXplore - github | demo

- Built a fully responsive movie browsing platform using **Next.js and Tailwind CSS**, delivering a smooth UI across devices with **SSR and SSG** for blazing-fast load times and SEO optimization.
- Integrated real-time data from the **TMDb API** to display detailed info on movies and shows, including trailers, genres, and ratings.
- Designed a custom **search and filtering** system with genre, release year, and rating filters, improving content discoverability.
- Achieved **90+ Lighthouse scores** in performance and accessibility by implementing lazy loading, route-level code splitting, and image optimization.
- Deployed on **Vercel,** implemented Google Analytics for traffic insights and user flow tracking.

EDUCATION

Masai School | 2022
Full Stack Web Development - Software Engineering

Savitri Bai Phule University | 2017 - 2021
Bachelor of Technology (B Tech) Information Technology
